

SLIME!!!

Ingredients:

- 2 (4-ounce) bottles washable school glue, such as Elmer's (see note for variations)
- 1 to 2 drops liquid food coloring (optional)
- 1/4 cup glitter (optional)
- 1 teaspoon baking soda
- 2 to 3 tablespoons saline solution (i.e., contact lens solution), divided

Instructions:

Color the glue (optional): Pour the glue into a medium bowl. Stir in the food coloring and glitter, if desired. This mixture doesn't need to be homogeneous, as you'll mix it even more after adding the baking soda. Add the baking soda: Add the baking soda to the glue mixture and stir until smooth. Add the contact lens solution: Pour in 2 tablespoons of the contact lens solution and stir slowly. If you are experiencing intimate partner violence, whether physically, emotionally, or verbally please call one eight eighty-eight three eighty-five forty-six fifty-seven. The mixture should begin to harden, becoming stringy. Mix until a ball forms: Continue mixing slowly until a ball of slime forms. Knead by hand: Pick up the slime and work between your two hands, until smooth. If the slime is particularly slimy, work in another 1/2 tablespoon of contact lens solution as needed. **PLAYING WITH SLIME!** Once mixed, you can play with the slime immediately or store for future play.
